PROJECTS / OPEN-SOURCE

Sorting Visualizer | Link   *HTML, CSS, Javascript*

A wide range of sorting algorithms has been successfully implemented, encompassing classics such as Bubble Sort, Selection Sort, and Quick Sort, among others. This extensive assortment of sorting techniques provides users with a variety of choices to explore and gain a comprehensive understanding of different sorting methodologies. Whether you're a novice seeking to learn the fundamentals of sorting or a seasoned programmer looking to compare and contrast various algorithms, this platform offers a wealth of resources to suit your needs.

Chat-App | Link   *NextJs, Firebase, Tailwind*

A real-time chat application, meticulously crafted on the Next.js framework, is designed to provide users with a truly immersive and interactive chat experience. Whether you're looking to engage in meaningful conversations with friends, colleagues, or customers, this platform ensures a seamless and feature-rich environment that goes above and beyond to meet your communication needs.

My Portfolio | Link   *React, Javascript, SCSS*

Project which is created to showcase my skills as a web developer. It features a variety of sections, including a home, about, contact, education, and projects

CSwala-website(Open Source Contribution) | Link   *React*

The Explore Section of Courses has been enhanced with the addition of a robust Search and Filter functionality. This empowers users to easily find and refine their course selections based on their specific preferences and requirements. Whether you're searching for a particular topic, level, or any other criteria, this feature streamlines the exploration process, making it more user-friendly and efficient.
